## QUISSET WILDLIFE MANAGEMENT AREA

(Blackstone, Mendon)

- SIZE: 388 acres of rolling forested upland with some wetland and field habitat. The eastern side of the area is accessible from Providence/Blackstone Street; the northern side from Quisset Hill Road. U.S.G.S. Quad: Blackstone, Mass. - R.I.
- VEGETATION: The area is dominated by second growth mixed hardwood and conifer forest, but there are several areas of field habitat in various stages of succession.
- WATER: Hop Brook, a cold water stream containing native trout, forms the western border of this WMA. A small swamp comprises the headwaters of the little brook on the eastern side of the property.
- WILDLIFE: Grouse, deer, gray squirrel, fox, turkey and numerous nongame species. This area is not stocked with pheasant.
- SPECIAL  
REGULATIONS: None.
